Group Assignment

This course includes a group assignment worth **25%** of the total assessment, focused on the practical application of course concepts. This assignment provides an opportunity for you to learn from one another and actively participate in each other's learning. You will also develop skills valued by employers, such as problem-solving, negotiation, conflict resolution, leadership, critical thinking, and time management.

Working effectively in teams is crucial, and this course offers a chance to develop these skills through group work as part of the assessment tasks. The assignment will be evaluated based on technical accuracy, practical application, and the quality of the written work.

Groups are required to select their own topics and **propose a useful linear regression model for a real-world problem using real-world data**.

The group assignment is due on **Sunday, November 1, 2026, by 6:00 PM (18:00)**.

The submission must be made in two formats:

1. **Electronically** on the course website **without** the cover page and AI declaration form.
2. **By email** to aywu@ntu.edu.sg , **including** the cover page and AI declaration form.

Both versions must be submitted for the submission to be considered complete. Failure to do so will result in a late submission penalty.
